

DON'T LOOK INSIDE

(Unless you are interested in
Silo Improvements)

Introducing an Entirely New Idea
in Hart Silo Doors.

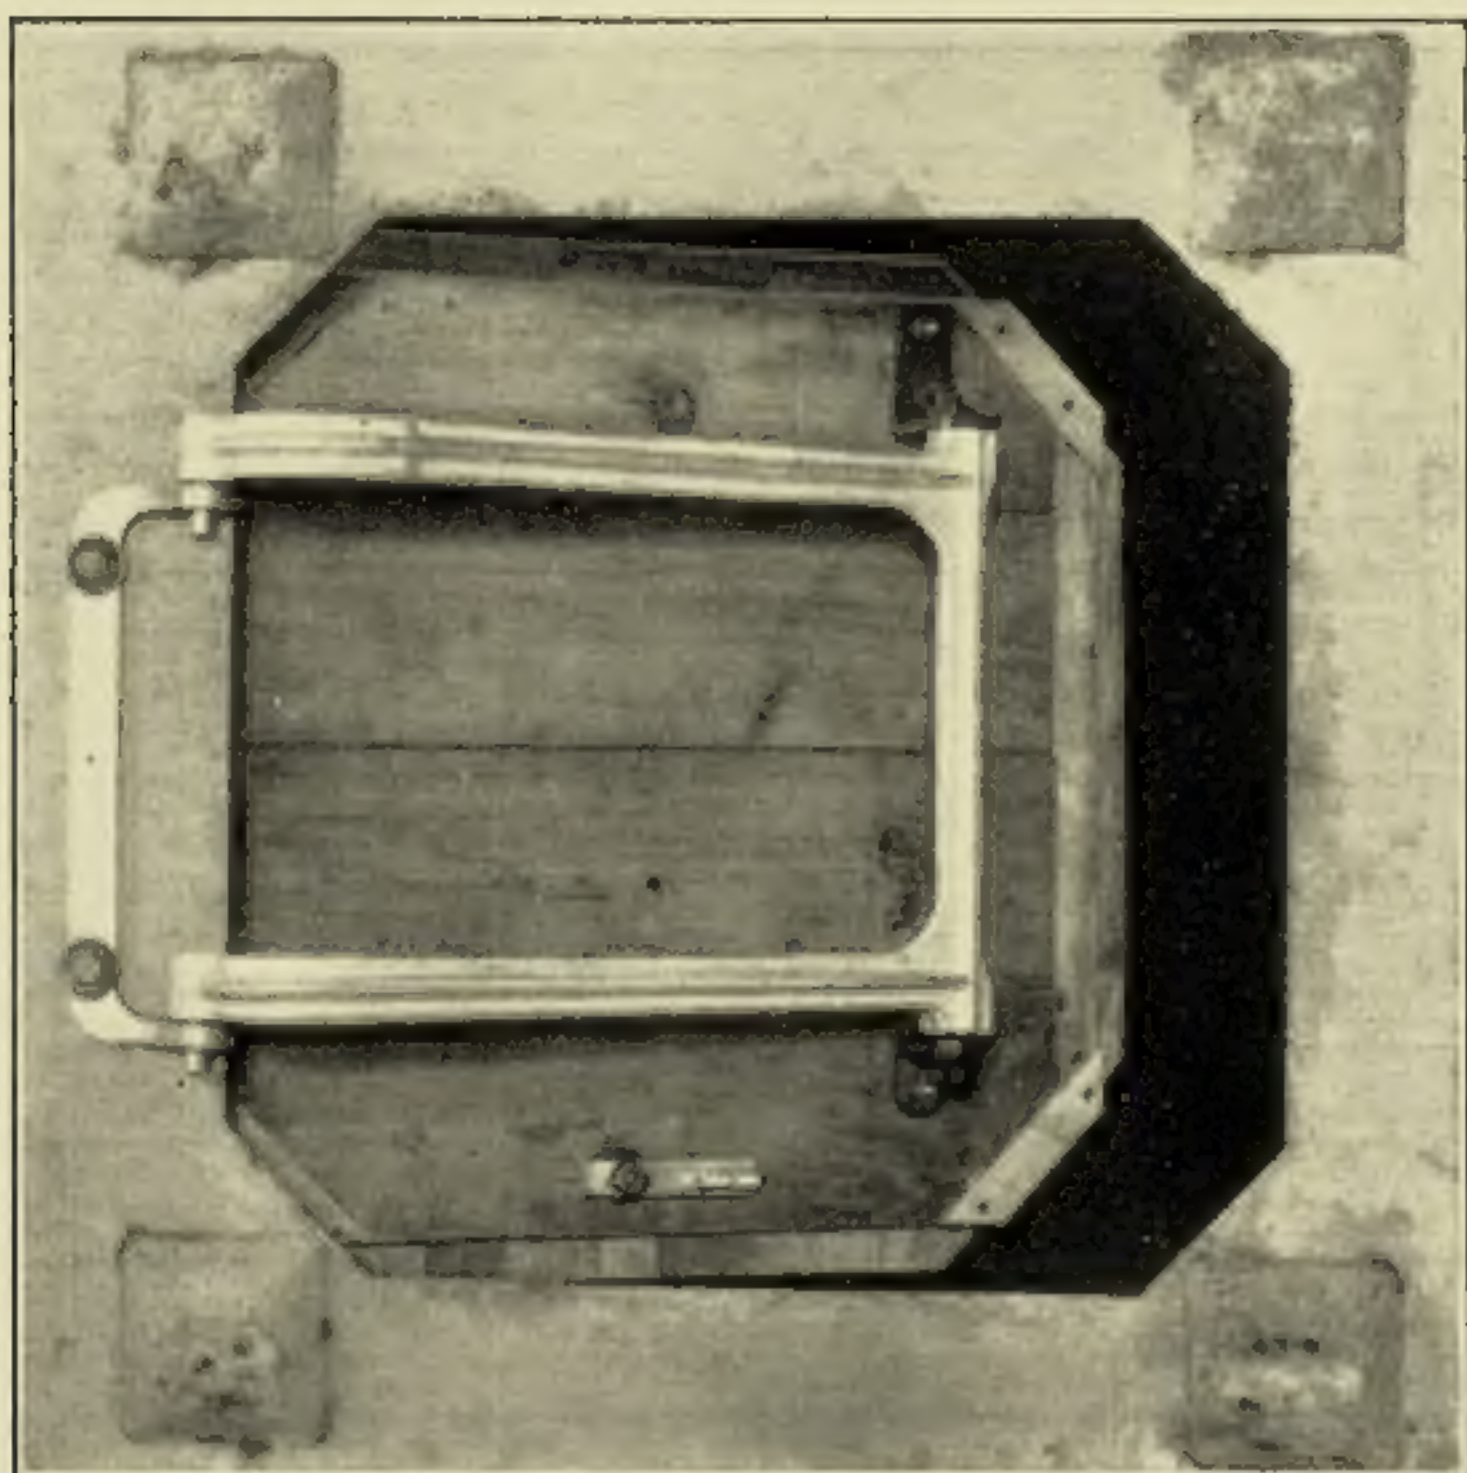

In keeping with our policy of always supplying our customers with the very latest improvements in Hart Reinforced Concrete Stave Silos, we call your attention to our new, improved, **HINGE DOOR**, which we offer to the 1931 trade.

This view shows the new door in place, closed and fastened. Note the sturdy construction, efficient safe ladder and its **SIMPLICITY**.

Nothing to get out of order, always in place.

Please note that there are no steel or metal parts **CAST IN THE CONCRETE FRAME.** In case the hinges ever break or rust, or any other part needs repair, same can be made without disturbing the concrete frame.

View showing the hinged door partly open. Note that the door swings back against the silo wall and can be lifted off its hinges if desired. This door has been carefully developed and like all Hart Silo accessories, it is perfect.

You may be certain that you can buy no better silo than a HART. Yet our prices are extremely low.
